WATCHDOG 3

Instant Recovery System

Only WatchDog Instant Recovery System of FNet can immediately & completely repair the Windows data or system damages. With WatchDog, your PC operating will become more fluently.

Simple & Easy Data Protecting Solution

Complete Software, The Whole New 3rd Generation Engine

The whole new 3rd generation data recovery engine can be installed in the Windows. Easy installation, won't destroy the original OS or data.

The Sole Leader Among The Recovery Technologies

Since WatchDog was published, FNet has created many excellent technologies, which are imitated by other brands

Specialized Patent Technology

F-SAVE Space Distribution Tech

W.DOG adapts the newest F-SAVE (FNet System Area Virtual Engine) technology. Using the H.D. auto-search tech to save and compress the backup data which doesn't need the additional partition or pre-occupy the H.D. space. Therefore, the users won't feel any waste of H.D. space. Retain the efficiency and space to users. ◦

F-POINT, Multi-Restore Points Tech

The other brands of recovery systems which equip with only one restore point or claim to have the multi-restore points can't let the users to freely choose the restore points and reuse them. According to this, FNet develops the whole new **F-POINT**, Freely Choose Multi-Restore Points Tech. It not only can record the multi-restore points, but also can be restored to any points as many times as they want. Every restore records is independent and won't disappear after restoration. The users always can keep the final choice.

F-CACHE, Quick Data Cache Tech

Whereas the complex operation and data operating on the recovery system, the other brands will reduce about 20%~50% of H.D. efficiency. Only with the **F-CACHE**, Quick Data Cache Tech from FNet can reduce the loss to 2%. WatchDog is acknowledged now as the best recovery system in the software market.

SYSTEM AGENT Kernel Tech

WatchDog Instant Recovery System adapts for the 32-bit operation system, therefore the IDE device can operate in the FAT16, FAT32, NTFS with higher efficiency and compatibility. System won't appear any bad sectors or exclamation mark message. The system operation will be more stable!

System Requirements

- Windows XP/2000/NT/Me/98/95
- 80386 or faster processor (80486 or faster processor is recommended.)
- W.DOG3 needs to be installed under Windows.
- 8 MB RAM(Windows NT 16MB)
- At least 100MB free H.D. space. The real space used depends on the H.D. size.
- VGA or higher resolution monitor.
- CD Rom & Floppy Disk Drive
- PS/2 or Serial compatible mouse is suggested but optional.
