Lock the hard disk spindle motor

Protect your data without encryption!

The first product in the world that can control the hard disk spindle motor ; increase the security of your data.

The best data security tool

FNet's newly developed HD-Power is able to lock the hard disk entirely. The hard disk cannot be used in another computer, and unauthorized access to data is eliminated. Prevents the data stored on a PC's hard disk from being read or used by an unauthorized person. Because the hard disk is locked, it cannot be low level formatted, fdisk, or formatted. LockUp makes a stolen hard disk unusable; it denies any access to the disk.

LockUp **NEW**
USB/PCI Version

- 1 PnP. No installation driver required.
- 2 Not encryption technology protect HDD data without modify the data. Lockup locks the hard disk capability to prevent any access to HDD.
- 3 Password protection. Without the password, the hard disk cannot be read, destroyed, or installed in another computer.
- 4 Protects all IDE hard disk.

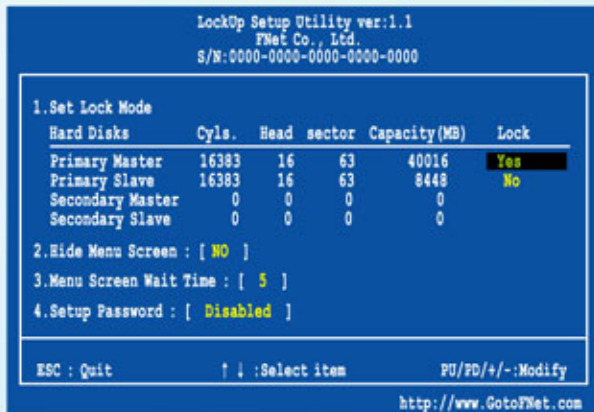

The best data security tool

LockUp was launched and utilizes a brand new concept in data security. Other data security products are just encrypting the hard disk data, people can still decrypt or reformat the disk if they so desire. Without LockUp, your private data has never been safe!

FNet's newly developed HD-Power is able to lock the harddisk entirely. The hard disk cannot be used in another computer, and unauthorized access to data is eliminated. Prevents the data stored on a PC's hard disk from being read or used by an unauthorized person. Because the hard disk is locked, it cannot be low level formatted, fdisk, or formatted. LockUp makes a stolen hard disk unusable; it denies access to the disk.
